SUMMARY

Lead Quality Assurance Engineer focused on delivering high-quality software across SaaS, CRM, web, mobile, and API-driven applications. Experienced in leading manual testing efforts, developing test strategies, validating business requirements, and collaborating with cross-functional teams to ensure successful product releases. Skilled in exploratory, regression, functional, and API testing, release readiness, defect triage, and customer workflow validation. Driven by continuous learning and eager to expand expertise in test automation while building software that improves people's lives.

Java • JavaScript • HTML/CSS • SQL • REST APIs • JSON • Postman • Web Application Testing • Mobile Testing (iOS & Android) • API Testing • Functional Testing • Regression Testing • Exploratory Testing • Smoke Testing • Data Validation • Defect Tracking • SaaS Applications • CRM Platforms • SDLC

PROFESSIONAL EXPERIENCE

Lead Quality Assurance Engineer
Cutter Croix | Jan 2024 – Present

Promoted from Quality Assurance Engineer within first year based on quality leadership, release ownership, and cross-functional contributions.

- Lead quality strategy and release readiness across multiple SaaS product areas.
- Partner with Product and Engineering to define testable requirements and acceptance criteria.
- Design and execute test plans, test cases, regression, and exploratory testing.
- Identify risks, edge cases, and scope gaps before development and release.
- Validate web, mobile, CRM, and API functionality against business requirements.
- Lead defect triage, prioritization, and root-cause analysis.
- Create and maintain QA documentation, standards, and testing processes.
- Provide go/no-go recommendations based on quality and product risk.
- Support successful releases through cross-functional collaboration.

Route Sales Representative |Frito-Lay
Jul 2019 – Aug 2023 | Cleveland, OH

- Managed a high-volume sales territory while consistently meeting performance goals.
- Maintained accuracy across inventory, routing, and customer commitments.
- Built strong customer relationships through proactive communication and issue resolution.
- Identified and resolved operational issues before they impacted service quality.
